

# FLAT GASKETS

Asbestos-free flat gaskets are obtained from a flat sheet material. Thanks to a WATER JETTING plant we can make them in any shape. Gaskets are provided according to standard and customized dimensions, and cut with a special device.

**Dimensions:** from 5 mm up to 5000 mm  
when the gasket is bigger than the raw material sheet we make special and proper joints.

## Standard dimensions according to:

**DIN** flanges

**ASME** B 16.20 (API 601) for ANSI B 16.5 flanges

**BS** 1560 for ANSI B 16.5 flanges

**ASME/ANSI** B 16.47 series A for MSS SP 44 flanges

**ASME/ANSI** B 16.47 series B API 605 flanges in accordance with ASME B 16.5 (API 601) gasket standard

**DIN** 2632 - 2638 flanges

**Graphite** - This is 99% pure graphite reinforced with an eyeleted SS 316 layer.
